

Each member of **ABASS** participates in the life of the association by committing to respect values. These values constitute the foundation of the association. Each member undertakes to carry them and develop them both in their practice of simulation only within the framework of association meetings.

## **VALUES**

- Spirit of openness:

Respect for multidisciplinary and multi-professionalism,  
Valorization of diversity.

- Kindness :

Respect for others.

- Share :

Share, help each other and discuss different practices in terms of health simulation.

- Collaboration :

Collaborate to help the development of the simulation and progress yourself thanks to others.

## **GOALS**

- Bring together the various players in health simulation in Bourgogne Franche-Comté and beyond.

- Promote the development of health simulation for training and research.

- Create a network of diverse professionals, interested in pedagogy, education and research in health simulation.

- Respond to information needs and ensure the organization of days exchanges around health simulation.

- Ensure compliance with good practices in health simulation.
